1. About us

Beijing CISRI-NMT Advanced Materials & Technology Co., LTD (abbreviate for AMT) concentrates its abilities in National Science and Technology Major Projects, and was founded by China Iron & Steel Research Institute Group. As the first enterprise to implement the closed clean hot-dip galvanization product line, and being the solutions and service provider for environmental equipment systems, after years of painstaking research, development and practice, a fully enclosed clean hot-dip galvanization product line has been development.

1. About us

Dongdian Energy Equipment Co., Ltd. is a company producing coating, photovoltaic, power communications, steel and other products. Now a fully enclosed clean hot-dip galvanization product line has been installed which is designed by AMT.

2. Closed clean-type hot-dip galvanization product line

3. The existing and future product line

Xingan photoelectric Heating Equipment Co., Ltd., Hebei
(under construction)

United Power Equipment Co., Ltd., Liaoning
(under construction)

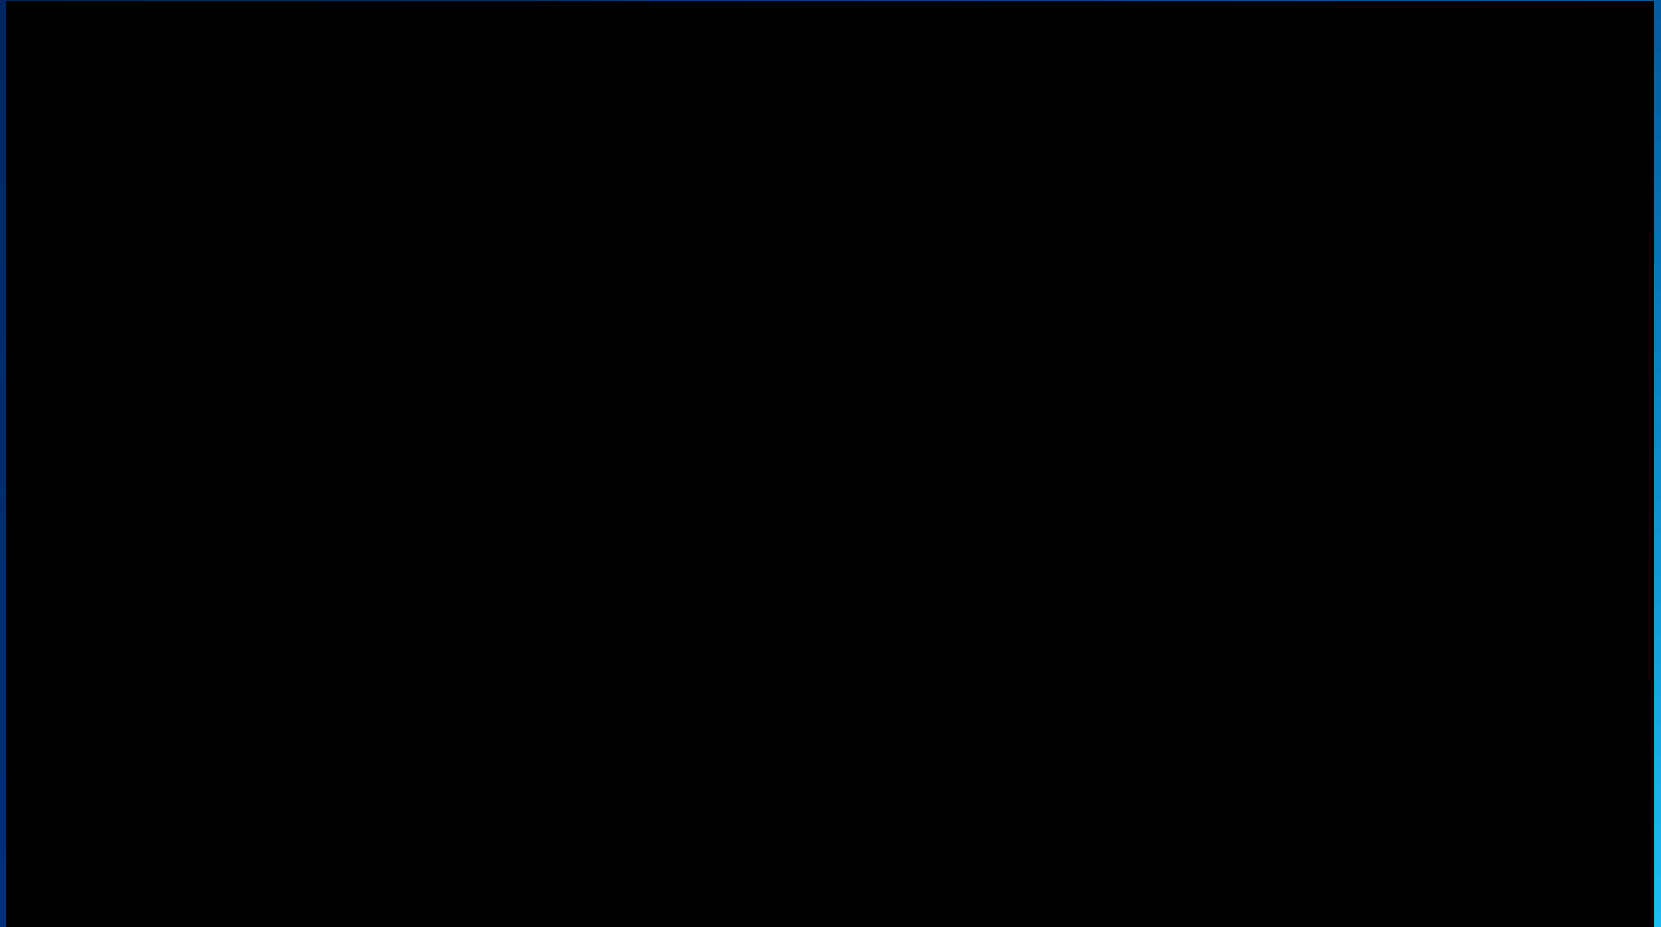

Dongdian Energy Equipment Co., Ltd., Hebei
(under construction)

Zhuoyi Environment Production Equipment Co., Ltd., Hebei

Jintaisheng Machinery Co., Ltd., Shandong

Bolivarian Republic of Venezuela production line

4.The video of steel pipe product line

Thank you for your attention
